Build Keylogger Server

Next, fill out the simple interface to make your first server.

Gmail User/Pass:	Enter the gmail Username/Password for the account in which you want to receive the logs.
Icon File Location:	The Location of the .ico file you want to use on your server (Not required)
Interval:	How often you want to be emailed logs in hours. (every 5 hours recommended)
Download link:	If the downloader checkbox is ticked, put the direct url to the file you want to download e.g. rat/botnet here.
Error Message Setup:	Input the title and error message you want to show when the server is clicked.
Anti's:	Helps protect server from Anti-Virus Programs (Highly Recommended)
Add To Startup:	Select this checkbox if you want your server to be run every time the victims computer starts up. (recommended)
USB Spread:	Enables Server to be launched from a USB
Delete Cookies:	Select this checkbox if you want to victim to have to enter all their saved passwords again. (recommended)
Kill Task-Manager:	Will not allow victim to remove server through the task manager (May seem suspicious)
Icon Changer:	Enables Icon Changer
Fake Error:	Enables Error Message.

Here is a completed example of the interface:
